When you call yourself an Indian or a Muslim or a Christian or a European, or anything else, you are being violent. Do you see why it is violent? Because you are separating yourself from the rest of mankind.

When you separate yourself by belief, by nationality, by tradition, it breeds violence. So a man who is seeking to understand violence does not belong to any country, to any religion, to any political party or partial system; he is concerned with the total understanding of mankind.

AS I GET OLDER I REALIZE:

1. I talk to myself, because sometimes I need expert advice.
2. Sometimes I roll my eyes out loud.
3. I don't need anger management. I need people to stop pissing me off.
4. My people skills are just fine. It's my tolerance of idiots that needs work.
5. The biggest lie I tell myself is "I don't need to write that down, I'll remember it."

8. Even duct tape can't fix stupid, but it can muffle the sound.
9. Wouldn't it be great if we could put ourselves in the dryer for ten minutes; come out wrinkle-free and three sizes smaller?
10. "Getting Lucky" means walking into a room and remembering why I'm there.

Teacher Arrested at JFK

A public school teacher was arrested today at John F. Kennedy International Airport this morning as he attempted to board a flight while in possession of a ruler, a protractor, a compass, a slide-rule and a calculator. At a press conference just before noon today, Attorney General Eric Holder said he believes the man is a member of the notorious Al-Gebra movement. Although he did not identify the man, he confirmed the man has been charged by the FBI with carrying weapons of math instruction.

'Al-Gebra is a problem for us', the Attorney General said. 'They derive solutions by means and extremes, and sometimes go off on tangents in search of absolute values.' They use secret code names like "X" and "Y" and refer to themselves as "unknowns" but we have determined that they belong to a common denominator of the axis of medieval with coordinates in every country. As the Greek philosopher Isosceles used to say, "There are 3 sides to every triangle." The Attorney General went on to say "Teaching our children sentient thought processes and equipping them to solve problems is dangerous and puts our government at risk."
